Continuation Sheet (PTO-303)

Application No. 09/423,179

Continuation of 2. NOTE: For example further consideration and/or search would be required for the new limitations of proposed claim 3 in regards to input of one or more woven fabrics, computing and representing an actual fabric on the basis of the yarn diameters and the freely definable woven fabrics, and changing the actual woven fabrics so that it is adapted to the measured individual yarn diameters and the inputted woven fabrics. Similar comments apply to claim 18 and its dependent claims. Additionally it appears that consideration would have to be given to a 35 U.S.C. 112 second paragraph rejection of claim 34 as lacking antecedent basis for "the freely definable woven fabrics".
